

**2011 FINAL:**  
**LABOR MARKET SUPPLY-DEMAND ANALYSIS FOR PATIENT-CARE REGISTERED NURSES**  
**EAST CENTRAL ECONOMIC DEVELOPMENT REGION (EDR)**

**Demand:**

**1. Determine current/base year occupational employment and projected growth rate.**

**a. Reconcile with other data sources (e.g., IDFPR licensure data).**

Number of licensed RNs, 2011 (IDFPR) = 4,780

Percentage of licensed RNs retired = 12.3%

Percentage of RNs in non-patient-care industries = 10.9%

Number of licensed APNs, working as APNs = 263

Number of patient-care RNs = (licensed RNs) less (% RNs retired) less (% RNs in non-patient-care industries) less (licensed APNs, working as APNs)  
= 3,408

Number of RNs, 2011 (IDES estimate) = 3,475

\* Current Occupational Employment, Registered Nurses = 3,450

**b. Compare IDES projections to national growth rates and industry studies.**

Employment trends in the State of Illinois in Healthcare over the last 5 years:

- the annual growth rate for Healthcare jobs has ranged from 1.4% to 2.4% (and from -1.4% to 2.1% for the East Central EDR):
- within just Ambulatory Health Care (32% of Healthcare employment), from 3.0% to 3.9%;
- within just Hospitals (34% of Healthcare employment), from -0.9% to 1.4%; and,
- within just Nursing & Residential Care Facilities (20% of Healthcare emp.), from 1.1% to 2.6%.

(Note: the annual growth for all jobs in the State of Illinois has ranged from -4.9% to 1.2%.)

Projected (BLS/IDES) growth rates for this occupation:

Nation = 2.2%

State = 2.1%

\* Consensus occupational growth rate = 2.1% = 72 new RN positions per year

**2. Account for possible adjustments to separation/replacement rates based upon occupational- or industry-specific studies of vacancy rates and turnover rates.**

- The IDES replacement rate = 1.58% (includes separations from the occupation due to retirement, death, occupational transfer and for family or health reasons).
- Data on planned years until retirement from the IDFPR Nursing Workforce Survey Report indicate an annualized retirement rate that ranges from 1.4% in the first year to 3.5% in 6 to 10 years in the East Central EDR.

\* Consensus occupational replacement rate = 2.9% = 100 RN positions per year due to replacements

\* (Current Employment) X (consensus growth rate) + (Job Replacement Openings) =

**Regional Demand for Registered Nurses = 172 RN job openings per year**

## Supply:

3. **Account for all sources of education and training.**
    - a. **Create a data base of program completers.**
    - b. **Calculate an average annual supply by program level - best-fit supply trend/projection.**
    - c. **Utilize administrative files to adjust supply figure (e.g., licensure rates from IDFPR).**
  4. **Supply adjustments needed to account for leakage, e.g., from IL (leaving the state for employment); from the industry (RN employed in non-healthcare occupation); and, from labor force (further education, not working).**
- 5-year (2006-2010) avg., educ. completers (public & private), both ADNs and BSNs = 210.
  - # of graduates steadily increasing from 140 (in '06) to 260 (in '10) = up 86% over 5 years.
  - Over those same five years:
    - 100% of completers were tested.
    - of those tested, 82.3% passed.
  - Based upon licensure data from IDFPR, from 2006-2010 (the same 5 years):
    - annual number of newly licensed RNs has increased substantially from 175 to 260.
    - 81% were trained at Illinois educational institutions, 13% were domestically trained (outside IL), and 5% were foreign trained. (Note: 1% undetermined.)
  - In this region, from 2001 to 2010, there were 1,386 newly licensed RNs. 15% are not working in any industry in IL. (> 6% are working in non-healthcare industries, majority of those are in Personnel Supply, Misc. Services, Education, and Government industries.)

## Projected Annual Regional Supply of Registered Nurses =

Based upon recent trends, New Active Licensed RNs each year = 250  
(less) avg. leakage rate of 25.0% = (less 63) = 187

## Estimated Annual Supply-Demand Balance of RNs = (through 2018)

Demand (less) Supply = 170 - 185  
= +15 (Balance)
