IDFPR has streamlined licensing for **Military members and their spouses** who are seeking professional licensure in Illinois. Public Act 100-286 (2019) expedites the license review process for Military Service Members who are an active duty member or whose active duty service concluded within the preceding two (2) years before application. This review process also is applicable to spouses of service members. IDFPR has hired a military liaison to work directly with Military Service Members to provide them with tailored guidance when applying for professional licensure in Illinois.
